

## Guidelines for determination of CDA allocations for Administrative (Clinical, Education and Research) roles

The Department of Anesthesiology Career Development Award (CDA) program provides faculty time for administrative activities and is the Department's shared commitment to faculty career development and in support of the Departmental missions. The table below provides guidelines with regards to select administrative activities; the *upper* limit of recommended CDA days is provided for each activity. Administrative roles not listed below may still be eligible for CDA days if justified in application. If you have two synergistic administrative roles, the CDA allocation may not be an arithmetic sum of the days listed below. Final allocations are made by the CDA and Executive Committees and is subject to change if the scope of the associated work were to change during the year. CDA days can be re-allocated throughout the year if faculty take on new responsibilities mid-year.
