Vancomycin-S	123	45	94	94	94	ND	43	100

*Daptomycin susceptibility for *E. faecium* indicates percentage susceptible, dose dependent.

ND, not tested.

Drugs of choice for *E. faecalis* include penicillin and ampicillin in the absence of severe penicillin allergy.
VRE infections often require treatment with restricted antibiotics such as daptomycin, which require ID approval for use.
