We are pleased to announce the creation of the Vanderbilt Biostatistics Data Coordinating Center (VBDCC), a biostatistical and data coordination resource for biomedical research of all types. It will provide scientific and technological support to clients across the world through its Design & Analysis, Data Management, and Tool Development Units.

Since the founding of our department twenty years ago, its biostatisticians, analysts, and developers have cultivated extensive collaborative partnerships with existing resources and business units at Vanderbilt University and Vanderbilt University Medical Center, including the Vanderbilt Institute for Clinical and Translational Research (VICTR), Vanderbilt-Ingram Cancer Center (VICC), and Vanderbilt Memory and Alzheimer's Center (VMAC), resulting in hundreds of publications, presentations, and packages. VBDCC personnel also are accustomed to working with funding and regulatory agencies such as the National Institutes of Health (NIH), Patient-Centered Outcomes Research Institute (PCORI), and US Food and Drug Administration (FDA). The VBDCC is thus well placed to offer a comprehensive pipeline for biostatistical and operational support of cutting-edge research and development.

To learn more, browse the VBDCC webpages. Contact vbdcc@vumc.org to initiate discussions of collaboration and obtain price quotes.
Center for Quantitative Sciences
Summer Institute

Last call for registration!
Enrollment for “Big Data in Biomedical Research” and “Introduction to Causal Inference” closes July 10.

Sign up at vumc.org/cqs/cqs-summer-institute

Free webinars
Bryan Shepherd
“Multi-wave Validation Sampling to Improve Estimates Derived from Electronic Health Record Data” Offered by the FDA's Sentinel Innovation Center

Tuesday, July 11
11 am–noon CDT
Register via the webform

Bradley Malin
“Modeling, Measuring, and Mitigating Privacy Risks in Large Biomedical Datasets” Free webinar

Hosted by the American Statistical Association Privacy and Confidentiality Committee

Monday, July 24
11 am–noon CDT
Register via the course flyer

Short Course: From R Markdown to Quarto
Mine Çetinkaya-Rundel, Duke University and RStudio
Hosted by the Middle Tennessee chapter of the ASA

Friday, October 20, 9:30 am–5:30 pm CDT
Quarto is an open-source scientific and technical publishing system that offers multilingual programming language support to create dynamic and static documents, books, presentations, blogs, and other online resources. Learn how to apply your reproducible authoring skills to the Quarto format and use new tools and workflows in RStudio.

A link will be posted on our homepage in mid-July when registration opens. There will be a discount for ASA members—visit amstat.org/membership to join the association, and the ASA Chapters page to join the local community, whose leaders include Simon Vandekar, Robert Johnson, Rameela Raman, and Amber Hackstadt.

Dates and other details subject to change. Check our website for updates and additions.
At press time, the slate of prominent biostatisticians scheduled to speak at this event includes department chair Yu Shyr, CRAB chief of strategic alliances John Crowley, University of Washington professor Patrick Heagerty, and Harvard University professor Xihong Lin.

Visit vumc.org/biostatistics/symposium09292023 for additional confirmations and updates.
Appointments and Promotions

Visit Our People for more about these individuals. Appointments and promotions taking effect after July 1 will be reported in future issues.

Robert Greevy  
Professor

Cassandra “Cassie” Hennessy  
Senior Biostatistician

Hsi-Nien “Jubilee” Tan  
Senior Application Developer

Jing Yang  
Research Assistant Professor

Ryan Moore  
Senior Biostatistician

Interested in employment at Vanderbilt University Medical Center?  
See our Careers page for current postings.
Equity, Diversity and Inclusion
Mario Davidson appointed associate vice chair

Associate professor Mario Davidson has been appointed associate vice chair of equity, diversity, and inclusion (EDI) for the Department of Biostatistics. Winner of the 2022 Geoffrey Chazen Award for Innovation in Medical Education and member of the Academy for Excellence in Education board, Davidson will assist vice chair of EDI Leena Choi with promoting awareness and fulfillment of EDI initiatives and standards across the department.

The Vanderbilt Biostatistics Summer Internship Program for Underrepresented Undergraduates hosted its second cohort from May 8 through June 16, with participants Tracy Brown (Howard University), Youssef Botros (Middle Tennessee State University), Terrence Smith (Talladega College), and Karly Miller and LaShawnda Stevens (Tennessee State University). The paid internships culminated in scientific posters and professional presentations to a full room on the final day of the program. Each set of slides was followed by a lively Q&A session, with department faculty, staff, and students all contributing new insights and queries to the discussions.

Read more about the 2023 summer interns at their cohort page.
Dissertations Defended

**Valerie Welty**
March 8
Advisor: Jeffrey Blume
Dissertation: *On False Discovery Rates for Second-Generation p-Values*

**Chiara Di Gravio**
June 9
Advisors: Jonathan Schildcrout and Ran Tao
Dissertation: *Design and Analysis Methods for Modern Biomedical Studies with Longitudinal Outcomes*

Student Awards and Honors

Kaidi Kang - Student Research Award winner at the 36th New England Statistics Symposium, for “Double Anchoring Events Based Sigmoidal Mixed Model for Alzheimer’s Disease Progression Modeling” (co-authored by Dandan Liu and Panpan Zhang)

Jamie Joseph - Vanderbilt University Graduate Leadership Anchor Award

2023–2024 Biostatistics Graduate Student Association Officers

President: Marisa Blackman ✉️ Vice President: Ruby Xiong ✉️ Treasurer: Elisa Yazdani
Secretary: Shengxin Tu ✉️ First-year liaisons/outreach chairs: Yeji Ko, Lisa Levoir, Lan Shi

*Rameela Raman “gave amazing and constructive feedback while making sure to acknowledge everything I had done right, and she emphasized communication and collaboration skills I have found valuable in all other projects I have worked on since first year…. Rameela is my role model in this department, the field of biostatistics, and in life.” - Jamie Joseph in the May AmStatNews compilation of thank-you notes to mentors*
Funding Highlights - National Institutes of Health

“Statistical methods and designs for correlated outcome and covariate errors in studies of HIV/AIDS” - R01 renewed. Principal Investigator: Bryan Shepherd. Co-investigators: Gustavo Amorim and Ran Tao

“Mentoring in cholinergic regulation of vascular oxidation” - K24 awarded. Principal Investigator: Cyndya Shibao, with department support

“Harnessing big data to arrest the HIV/HCV/opioid syndemic in the rural and urban South” - R01 awarded. Principal Investigator: Peter Rebeiro

“Brazil Regional Prospective Observational Research in Tuberculosis network (RePORT-Brazil) - U01 awarded. Principal Investigators: Timothy Sterling and Bruno Andrade. Biostatistician: Gustavo Amorim. See also the $19.5 million NIH grant to Rutgers for RePORT International.

LEFT: Jonathan Schildcrout and Joshua Denny in 2012. Schildcrout is now vice chair of research and professor of biostatistics. Denny is CEO of the National Institutes of Health’s All of Us Research Program, working to create a diverse research community of one million people to facilitate thousands of studies on health and disease.

Photo: Anne Rayner / Vanderbilt University
Faculty Awards and Honors

Amir Asiaee - Placed second in the Bias Detection Tools in Health Care Challenge, hosted by the National Center for Advancing Translational Sciences with “MLK Fairness,” co-authored with Kaveh Aryanpoo

Amber Hackstadt and Andrew Spieker - Completed the Fleming Society mentorship program as members of the inaugural cohort

Paul Harris - Appointed Vice President for Research Informatics, Vanderbilt University Medical Center

Jackie Pennings - Received the Vanderbilt Orthopaedic Surgery Annual Research Award

Chris Slaughter - Received the Vanderbilt Epidemiology Teaching Award

Derek Smith - Elected to the International Society of Oral Oncology board of directors

Recent Presentations

(a selection - see our blog and previous bulletins for more listings)

Yaomin Xu, "EHR (Electronic Health Record): Potential Opportunities and Roadblocks for Machine Learning" - panelist, Analytics and Machine-Learning for Maternal-Health Interventions annual meeting, Chapel Hill, North Carolina - April

Shawn Garbett, “What They Didn’t Teach You About Decision Modeling” - co-instructor, Society for Medical Decision Making 18th Biennial European Conference, Berlin - May

Yu Shyr, “The Role of Biostatistics in an Increasingly Big Data/Data Science World” - panelist, National Institute of Statistical Sciences webinar - May

Jiangmei Ruby Xiong, Simon Vandekar, Kaidi Kang, Panpan Zhang, and Siyuan Ma were presenters and organizers at the 2023 Statistical Methods in Imaging Conference in Minneapolis - May (more details on our blog)

Bryan Shepherd, “The Vanderbilt-Nigeria Biostatistics Training Program” - speaker, CFAR (Center for AIDS Research) Symposium on Statistics and Data Science in HIV, Providence, June

See our Upcoming Presentations page for news about talks, posters, and workshops scheduled for Boston, Montreal, Tokyo, Toronto, Singapore, Berlin, and more.
Recent Presentations (continued)

Yu Shyr, “Future of Investigational Medicine and Smart Data—What We Learned from ChatGPT” - speaker, Taiwan Bureau of Foreign Trade Health+ Conference: Redefining the Digitalization of Future Healthcare, Taipei - June

Frank Harrell, “Statistical Concepts We Forget to Teach” - speaker, Icahn School of Medicine at Mount Sinai - June

Bryan Shepherd, “Statistical Methods and Designs for Addressing Data Quality in Studies of HIV/AIDS” - speaker, University of Utah - June
