

PRESSURE INJURY PREVENTION BUNDLE

All PATIENTS

- ◆ Skin Assessment
- ◆ Device Positioning
 - ◆ Pulse-ox probe rotated at least every 8 hours
 - ◆ Medical devices, tubes, wires and other objects not causing skin indentations with redness or breakdown
 - ◆ Foam silicone dressings under all C-Collars and BiPAP masks; other devices dressed as needed to protect skin integrity
- ◆ Moisture Management
 - ◆ Skin clean and dry
 - ◆ Bed linens are dry and wrinkle-free

HIGH RISK PATIENTS

- ◆ Patient Positioning
 - ◆ Patient and patient's head turned/repositioned every 2 hours or timed with NICU care, unless order set indicates otherwise
 - ◆ HOB elevated ≤ 30 degrees unless medically contraindicated
- ◆ Pressure Redistribution Surfaces
 - ◆ Appropriate bed
 - ◆ Pressure reduction devices
