

VUMC Preprocedural Testing Sites

The following sites are offering preprocedural testing for VUMC.

To avoid delays or the need for re-testing, patients should complete pre-procedure COVID testing at a VUMC location. Testing should be done as early as possible in the 72-hour window prior to your procedure. If patients are unable to reach a VUMC location, pre-procedure COVID tests must be a PCR test from the nose or mouth. No other tests are accepted including at-home testing kit results, antigen tests, and blood tests.

***Hours may vary on holidays or the business day before/after a holiday**

VUMC Preprocedural Testing Sites

The following sites are offering preprocedural testing for VUMC.

Walgreens Locations:

If testing at a Vanderbilt Health Clinic at Walgreens location, go online to www.myhealthatvanderbilt.com to make an appointment. Select "Lab" as the type of appointment. The online scheduling system will provide a number to text when the patient arrives at the clinic. Once texted, the staff will notify the patient when an exam room is available to decrease the time spent in the waiting area. Please note, that you must come to the Vanderbilt Clinic, not the pharmacy.
