

## Prepare for Your Child's Appointment

Thank you for choosing the team at Monroe Carell Jr. Children's Hospital for your child's care.

Our mission has always been to provide the highest quality, compassionate care tailored to your child and your family. That hasn't changed. Your child is in good hands.

The continued presence of COVID-19 in our community requires us to take additional precautions. **Here's what you need to know ahead of your visit about masks, our visitor policy, and testing before your procedure:**

### Masks

Everyone in Vanderbilt's hospitals and clinics must wear masks. We know that wearing masks can be a challenge for some children; if you are concerned about your child's ability wear a mask, please bring masks for everyone and discuss this with your care team when you arrive. Children under 2 generally do not have to wear masks.

### Visitor policy

For clinic visits and on the day of surgery, only 1 adult can be with the child. If your child stays overnight at Monroe Carell Jr. Children's Hospital at Vanderbilt, 1 parent or guardian is allowed at a time. You may designate 2 approved visitors, who can swap out every 24 hours.

### Pre-procedure testing

Before your child can have certain procedures, including any with general anesthesia, they must be tested for COVID-19. **This testing must be done 3 days before the procedure. If your child is not tested or if the result is not available on the day of the procedure, the procedure may be postponed until we can get a result.**

## TESTING FOR CHILDREN OF ALL AGES

Children of all ages are welcome at the clinics listed below. You may walk in for a test at any of these clinics. Or go to [childrenshospitalvanderbilt.org/program/Vanderbilt-children-after-hours-clinics](http://childrenshospitalvanderbilt.org/program/Vanderbilt-children-after-hours-clinics):

1. Click **Find a Location**.
2. Choose your preferred location.
3. Click **Skip the Wait Save My Spot**.
4. Enter your child's information.

When you arrive for the test at the after-hours clinic, you may walk in or call the phone number from the parking lot.

We will check you in from your vehicle.

Location	Address	Phone	Hours

*\* available only if the patient is already on the Vanderbilt University Medical Center campus*

***If your child is tested at a Vanderbilt Health location,***

- The result will show up in your child’s My Health at Vanderbilt account (if your child has an account).
- If the test is negative (does NOT show that your child has COVID-19), the procedure will go on as scheduled.
- If the test is positive (shows that your child does have COVID-19) and comes in during regular business hours, we will call you. The person doing the procedure will decide if it can go on as scheduled or needs to be postponed.
- If the result is positive and comes in after hours or on a weekend, you can call the Vanderbilt COVID hotline at 888-312-0847 and ask for a nurse to notify the provider on call for next steps.

***If you can’t come to one of our locations for testing,***

- ask your pediatrician, visit the state Department of Health website, or call your local health department to find a site that will test asymptomatic patients (patients with no symptoms). Here are links to testing resources:
  - TN Department of Health - <https://www.tn.gov/health/cedep/ncov/remote-assessment-sites.html>
  - Search for Tennessee testing sites - <https://carbonhealth.com/coronavirus/covid-19-testing-centers/Tennessee>
  - KY COVID 19 Drive Thru Locations - <https://chfs.ky.gov/agencies/dph/Pages/COVID-19-Drive-Thru-Locations.aspx>
- bring your test result with you on the day of your procedure. And have the result faxed to the operating room at 615-936-7060.

**Wherever your child is tested, you and your child must isolate yourselves until your child has the procedure. This means that both of you must:**

- **avoid people outside the household**
- **stay home as much as possible**
- **wear a mask in public.**

For your safety, your child’s safety, and the safety of other patients, visitors, and staff, we have put in place a number of practices to prevent the spread of COVID-19. These include the following:

- On the day of your child’s surgery, only 1 caregiver may accompany the child. This person must be screened before entering and cannot have any symptoms.

- Everyone who enters a Vanderbilt Health location must wear a mask, except for infants. If you don't have a mask, we will give you one.
- During the procedure, you must be available by phone or through your My Health at Vanderbilt account for the care team to communicate with you.
