

Price transparency saves patients an average of \$20 per month in co-pay costs

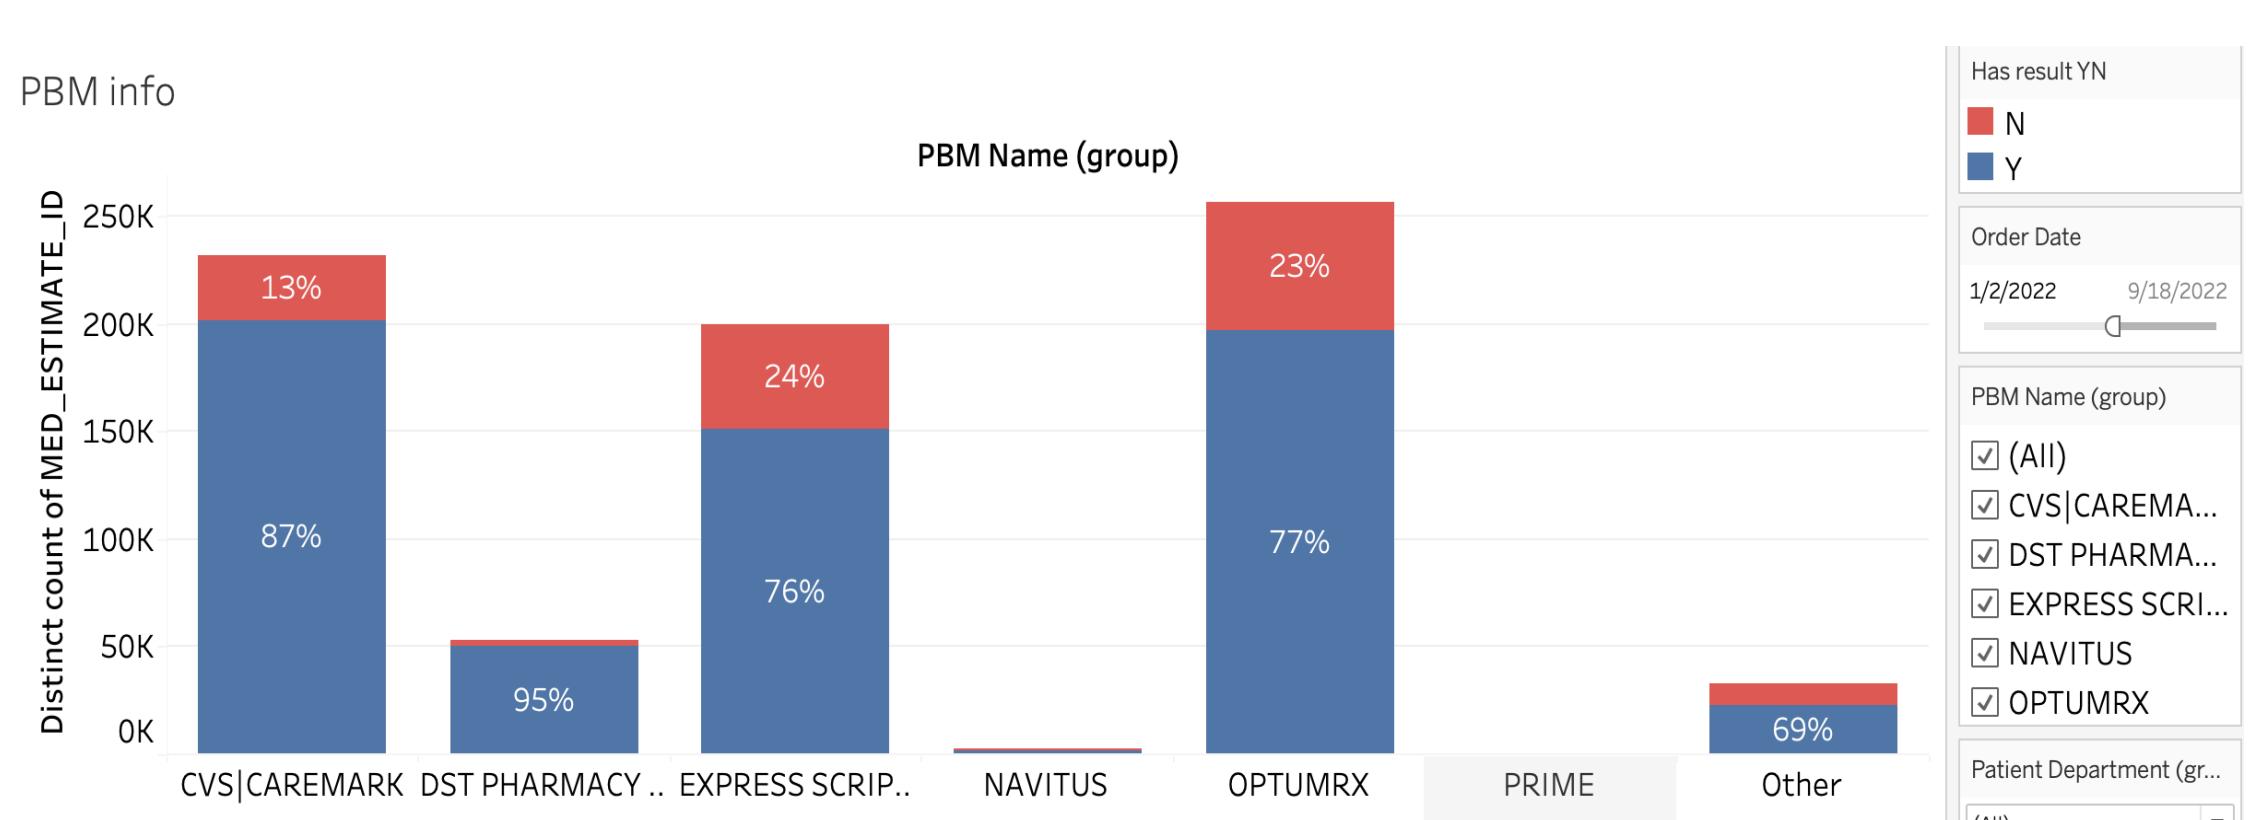

Price transparency at the point of prescribing with real-time prescription benefits (RTPB)

INTRO

- How much will this medication cost?
- Will a prior authorization be required?
- What alternatives present fewer hurdles?

METHODS

- External vendors capture data on 75% of orders.
- An alert is pushed to prescriber based on 2 criteria:
 - Prior Authorization (PA) required
 - Price savings of greater than 20 cents per day and copay greater than \$10 per fill
