

2004-2005 Seminar Series Speakers

Date	Speaker	Joint Sponsor	Title/Field of Study
08/31/04	Michael Bates, M.D., Ph.D., University of Cincinnati	Dept. of Pediatrics	Digestive system development and human disease
09/09/04	William Tremaine, M.D. Mayo Clinic Rochester, MN	Dept. of Medicine	Microscopic colitis
11/23/04	P.J. Utz, M.D. Stanford University	Dept. of Microbiology and Immunology	Proteomic assays to study blood cells and their secreted products
12/09/04	Andrew Neish, M.D. Emory University		Bacterial effects on epithelial signaling pathways
01/06/05	Jonathan P. Katz, M.D. University of Pennsylvania School of Medicine		Regulation of GI epithelial cells by the Krüppel-like factors
01/13/05	John Rawls, M.D. Washington University School of Medicine	Dept. of Pediatrics and Cell and Developmental Biology	A gnotobiotic Zebrafish model for analysis of host-microbial interactions in the vertebrate digestive tract
02/03/05	Gary Mawe, M.D. University of Vermont	Dept. of Neurosciences and Molecular Physiology and Biophysics	Serotonin signaling and neuronal excitability in the inflamed colon: too much of a good thing
04/05/05	Kathy Goss, M.D. University of Cincinnati	Dept. of Cancer Biology	APC, beta-catenin and cancer: looking beyond the Wnt pathway and transcriptional regulation
05/05/05	Lopa Mishra, M.D. Georgetown University	Dept. of Cancer Biology	Critical interactions between TGF- beta signaling and E-cadherin/Beta catenin epithelial cell-cell adhesion and tumor suppression
