

Seminar Series 2006-2007

Date	Name	Joint Sponsor	Title/Field of Study
10/11/2006	Thomas Boren, PhD Umea University Umea, Sweden		H. pylori adherence to epithelia cells
11/13/2006	Ramesh Shivdasani, MD, PhD Harvard University Cambridge, Massachusetts	Cell and Developmental Biology	Molecular Control of Gastrointestinal Development
1/9/2007	Charalabos "Harry" Pothoulakis, MD Harvard Medical School Boston, Massachusetts		Role of Neuropeptides
2/7/2007	Mike Gershon, MD Columbia-Presbyterian New York, New York	Molecular Neuroscience	Colonization of the Colon: Molecular Signals in Enteric Neuron Development
2/27/2007	Theresa Pizarro, PhD University of Virginia Charlottesville, VA		Dynamics of Intestinal Immune Systems
3/14/2007	Sheila Crowe, MD University of Virginia Charlottesville, VA		Gastric Inflammation, Oxidative Stress and their role in Gastric Disease
4/24/2007	Fred Gorlick, MD, PhD	Cell and Developmental Biology	Trafficking and Signaling
5/2/2007	Mike Caplan, PhD, MD Yale University New Haven, CT	Molecular Physiology & Biophysics, Pharmacology	Epithelial Integrity-Polarity & Injury
6/5/2007	Raj Kapur, MD, PhD University of Washington Seattle, Washington		ENS development, role of PKA in development of motility & analyzing murine models for congenital malformations of the enteric nervous system
