

## 2007-2008 Seminar Series

Date	Speaker	Joint Sponsor	Title/Field of Study
09/18/07	Masanori Hatakeyama, M.D., Ph.D. Institute for Genetic Medicine Hokkaido University, Japan		Cellular targets of <i>Helicobacter pylori</i> CagA in gastric carcinogenesis
10/24/07	David G. Binion, M.D. Medical College of Wisconsin		Is IBD a vascular disease?
11/27/07	Steve Cohn, M.D., Ph.D. University of Virginia		New horizons in IBD pathogenesis: stem cells, the intestinal epithelium, and innate immunity
12/11/07	Mark Donowitz, M.D. The Johns Hopkins School of Medicine		Regulation of the brush border Na/exchanger NHE3: how a transporter works; a story of complexes and cytoskeleton
03/25/08	Andrew Gewirtz, Ph.D. Emory University		Toll-like receptor 5-mediated immune responses to enteric microbes
04/28/08	Hans Christian Reinecker, M.D. Harvard Medical School		Intestinal microbial recognition and mucosal host defense mechanisms
06/10/08	Lora Hooper, Ph.D. University of Texas Southwestern Medical Center		Innate immune responses to commensal bacteria at gut epithelial surfaces
08/26/08	Jean Marie Houghton, M.D., Ph.D. University of Massachusetts Medical School		Bone marrow derived stem cells and the GI tract - functions in inflammation, repair, and cancer
