

2008-2009 Seminar Series

Date	Speaker	Joint Sponsor	Title/Field of Study
10/28/08	Deborah Gumucio, Ph.D. University of Michigan Medical School	Dept. of Cell and Developmental Biology	Hedgehog signaling in the gut - new links to old responses
11/03/08	Susan Henning, Ph.D. University of North Carolina	Dept. of Molecular Physiology and Biophysics	The elusive intestinal stem cell: progress and challenges
12/02/08	Cathryn Nagler, Ph.D. Massachusetts General Hospital		TLR-mediated signals from intestinal microbes regulate immune responsiveness
01/27/09	Luc Van Kaer, Ph.D. Vanderbilt University Medical Center		Thymus leukemia antigen controls intraepithelial lymphocyte function and inflammatory bowel disease
02/03/09	Martin Kagnoff, M.D. University of California at San Diego	Dept. of Pediatrics	Microbes as probes of the host innate mucosal immune and inflammatory response
03/03/09	Shanthi Sitaraman, M.D., Ph.D. Emory University		Adenosine 2B receptor: Biochemistry to Biology to Bedside
04/15/09	Frank Sinicrope, M.D. Mayo Clinic		Targeting Bcl-2/Bcl-xL proteins to enhance apoptosis in GI cancers
06/11/09	Sir Nicholas Wright Barts and the London School of Medicine and Dentistry		The expansion of mutant stem cells: the beginning of cancer
06/29/09	Alastair J.M. Watson, M.D. University of Liverpool		Cell shedding and intestinal barrier function
