

2009 - 2010 Seminar Series

Date	Speaker	Joint Sponsor	Title/Field of Study
08/04/09	Dirk Haller, M.D., Ph. Biofunctionality Technische Universitat Munchen (Technical University of Munich)	Dept. of Pediatrics	Bacteria-host interactions at the epithelial cell interface: inflammation meets metabolism
09/30/09	Scott Merrell, Ph.D. Uniformed Armed Services University		Learning to hide and wait: <i>Helicobacter pylori</i> life in the stomach
10/20/09	Dana Philpott, Ph.D University of Toronto		Nod proteins in infection and immunity
11/05/09	William Grady, M.D. University of Washington		Epigenetics and colon cancer
12/01/09	Cynthia Sears, M.D. The Johns Hopkins University		A microbial trigger for colon oncogenesis
01/19/10	Manuel Amieva, M.D., Ph.D. Stanford University		Life on the cell junctions
02/02/10	Karen Ottemann, Ph.D. University of California, Santa Cruz	Dept. of Microbiology and Immunology	The chemotaxis signal transduction system of <i>Helicobacter pylori</i> and its role in disease
03/04/10	Thad Stappenbeck, M.D., Ph.D. Washington University School of Medicine		Role of specific host susceptibility genes and environmental interactions in Crohn's disease
03/25/10	Asma Nusrat, Ph.D. Emory University	Epithelial Biology	Plasticity of the intestinal epithelial barrier: New insights into signaling events and repair
04/06/10	Sean Colgan, Ph.D. University of Colorado		Hypoxia, HIF, and mucosal inflammation

04/19/10	Mary Estes, Ph.D. Baylor College of Medicine		Norovirus vaccine development: a bench to bedside story
04/26/10	Averil Ma, M.D. University of California, San Francisco	Epithelial Biology	Ubiquitination and inflammation
05/25/10	Maria Abreu, M.D. University of Miami		Innate immunity: A key to understanding colon cancer
