Data to Policy (D2P) Health Economics Modeling

The Data to Policy (D2P) program, developed by Vital Strategies and the U.S. Centers for Disease Control and Prevention (CDC) as part of the Bloomberg Philanthropies Data for Health Initiative, aims to bridge the data-policy gap through team-based training and mentoring of health policy professionals. As part of this initiative, VUMC designed and delivered a one-week intensive modeling course for practicing health economists from Asia, Africa and Latin America, including pre- and post-course virtual engagement to ensure that each participant is able to apply the modeling methods taught to a policy or health technology assessment topic in their country. The objective of this activity was to provide a group of health economists from countries participating in the Data to Policy program with practical skills in decision modeling for health economic evaluation as well as access to a global network of similar professionals working in this area. The ultimate goal is to strengthen capacity of ministries of health in participating countries to use health economic evaluation in policy decision-making.

Aminu Kano Teaching Hospital-Bayero University Kano (BUK)-Vanderbilt University:

Developing Future Leaders in Child Neurology and Epilepsy Research (ABV)

Based in Kano, the hub of northern Nigeria, ABV will over five years provide research training and mentoring for three groups of future research leaders in northern Nigeria: (1) five ABV Faculty Fellows selected to develop and teach new courses at BUK targeting the needs of future research leaders in child neurology and epilepsy, under the mentorship of Vanderbilt faculty; (2) eight ABV Scholars who will complete the MScPH degree at BUK, launching their own research projects co-mentored by Vanderbilt and AKTH/BUK faculty, and attending the Vanderbilt Institute for Research Development and Ethics, where they will learn to write, submit and administer their own grants; and, (3) eight ABV Executive Scholars, mid-career physician[1]investigators who will devote half-time for up to two years to enhance their skills in an area of child neurology or epilepsy research, working under a mentor and taking selected courses at BUK. As part of the ABV grant, the Vanderbilt Improving Didactic Educational Approaches to Learning Methods (IDEAL) course is designed to capacitate faculty in teaching and learning competencies to build and strengthen the delivery of courses and programs in the health sciences.

Research for a Healthy Liberia (BRIDGE-U Liberia)

As part of the Bringing Research to Impact for Development, Global Engagement, and Utilization (BRIDGE-U) program, Yale University, Vanderbilt University, and the University of Liberia College of Health Sciences, will create the Center for Teaching, Learning, and Innovation (CTLI) in Liberia. This \$15 million project establishes a public-private-academic hub for research

utilization in the Liberian health sector. Through partnerships with public and private sector stakeholders, CTLI will advance evidence-based training, patient care, and health policy, while also building local capacity and engaging in implementation research.

UNZA-Vanderbilt Training Partnership for HIV-Nutrition-Metabolic Research (UVP)

The UNZA-Vanderbilt Training Partnership for HIV-Nutrition-Metabolic Research (UVP)

continues a longstanding training collaboration of the University of Zambia School of Medicine/University Teaching Hospital (UNZA/UTH) and Vanderbilt University (VU) and its Institute for Global Health (VIGH). With PEPFAR's successes turning HIV into a chronic condition, many Africans are living full lives with HIV, but they are facing non-communicable diseases that come with lifelong antiretroviral therapy (ART), lifestyle changes accompanying the epidemiologic transition, and aging. Nutritional factors are central to many of these, especially in low-income countries, affecting pathogenic processes in the gastrointestinal tract, kidneys, nervous system, and cardiovascular system. UNZA-VIGH collaborations have discovered multiple nutritional influences on ART outcomes. UVP support this by training UNZA PhD-level HIV research leaders in nutritionally- and metabolically-related complications and comorbidities of HIV, while expanding UNZA/UTH's research training and investigative capacities. Educational activities include performing a needs assessment for the UNZA PhD Program and facilitating a curriculum review and evaluation for all four Ridgeway Campus schools.

Clayton-Dedonder Mentorship Fellows Program

This supplement to the UVP grant funds the creation and refinement of a mentorship curriculum within the University of Zambia PhD Program and the training of 10 Clayton-Dedonder Fellows at UNZA. The University of Zambia (UNZA) Mentorship Program was developed and piloted to equip faculty with a cross-cutting set of mentoring competencies that focus on career guidance, professional development, and academic leadership. The curriculum was developed through a collaborative process with senior leaders at UNZA, educational experts at the Vanderbilt Institute for Global Health (VIGH), and the University of North Carolina (UNC) at Chapel Hill.

ImPACT Africa (Improving Perioperative & Anesthesia Care and Training in Africa)

Through this grant, Vanderbilt University School of Medicine's Department of Anesthesiology will develop training programs that can lower surgical and obstetric mortality, as well as improve and expand education of anesthesia providers in these regions. This will include the development of an innovative, interactive curriculum to train anesthesia providers who will practice in rural Kenya and other regions of the world. With the support of the GE Foundation grant, Vanderbilt will partner with Kijabe Hospital and the Center for Public Health and Development (CPHD) in Kenya to train 25 nurse anesthetists at a training center at Kisumu Regional Hospital and expand its network of trained anesthesia providers to four additional hospitals. The commitment employs a 'Train the Trainers' approach and will develop dedicated trainers in each hospital to provide for ongoing training in the most rural hospitals in Western Kenya. Through this grant, additional training in research methodology was developed through a multi-modal online course.

University of Guyana Master of Public Health Program

Supported by a two-year grant from the U.S. Centers for Disease Control and Prevention as part of the President's Emergency Plan for AIDS Relief (PEPFAR), educators from the Vanderbilt Institute for Global Health worked with partners from the University of Guyana, the Guyana Ministry of Health, and the University of California San Francisco (UCSF) to design and implement the first MPH program in Guyana. To address needs specific to the health system in Guyana, the MPH program was designed by Guyanese health professionals and educators with support and input from partners at Vanderbilt and UCSF. In addition to didactic coursework in epidemiology, biostatistics, environmental health sciences, social and behavioral sciences, and public health management, field practicum training emphasizes clinical epidemiology, surveillance, and applied public health. The project was fully transitioned to the University of Guyana Faculty of Health Sciences by the end of the grant.
