Examiner Instructions: Begin by having the subject look at the card. The interviewer will read the question and then allow the respondent to answer.

[Begin by having the subject look at the word reading list. Say the following:]

We will now move on to a small exercise related to the use of the Portuguese language. Look at each of these words carefully [the examiner should point to the words]. Read the words across the page so I can hear you. When you finish the first line, go to the next line and so on.

[Allow the subject 10 seconds to respond to each word. If the subject is in the middle of a response, let them continue before moving on. If 10 seconds passes without a response, say the following:] *Try the next one, please.*

[A subject's response should be counted as correct if they are able to pronounce the word properly, accounting for regional dialect variation or difficulty with articulation. If the subject makes a mistake on the first try, the subject should be asked to repeat the word. If they pronounce the word correctly on the second try, it should be counted as correct. No other help should be given. The subject should only be asked to repeat a word if they make a mistake on the first try or if the examiner cannot hear the response. If this happens, say:] *I could not hear you clearly. Please say the word again just as you did the first time.*

[Stop the exam if the subject fails to pronounce 10 words in a row correctly. If the subject IS ABLE to read more than 5 words on the word list, it is NOT necessary to administer the letter reading list. They automatically get credit for all letters on the list.]

**INSERT HERE THE NUMBER OF WORDS THAT WERE READ CORRECTLY:
NUMBER OF WORDS (IF ALL ARE READ CORRECTLY, THE NUMBER IS 42):**

LITSCOREWORD: _____

[In the case that a subject CANNOT read more than the first 5 words on the list, stop the word list and administer the Letter Reading list. Say the following:] *I want you to look at the letters on this line [examiner should point to the letters across the line]. Read me the letters one by one across the line.*

**INSERT HERE THE NUMBER OF LETTERS THAT WERE READ CORRECTLY:
NUMBER OF LETTERS (REMEMBER: IF THE RESPONDENT READS MORE THAN 5 WORDS, PUT THE
TOTAL POINTS FOR LETTERS WHICH IS 15):**

3, 5, 6, 17, 41

3 fingers 8 fingers

9 or 6? 42 or 28?

3 meticals, spend 1? 3 + 4 mangoes?

9 pencils, lose 3?

Examiner Instructions:	Correct Answer? (1) Y (0) N (8) DK (9) NA
Begin by having the subject look at the visual aid. The examiner will read a statement, and allow the subject to answer. After each question, the examiner should record the subject's answer.	
First, say the following:	
NUMTEST1 Look here [The examiner should point at the crocodiles]. Point with your finger and count these crocodiles one by one. Count the crocodiles out loud and tell me how many crocodiles there are. [If the response is correct (3 crocodiles) record 1; record 0 if incorrect]	
When the individual finishes, then say:	
NUMTEST2 Now point to these boxes and count them out loud. Tell me how many boxes there are. [If the response is correct (5 boxes) record 1; record 0 if incorrect]	
Continue with the following:	
NUMTEST3 Now I want you to tell me how many circles there are here [examiner points to the circles]. Point with your finger and count these circles one by one beginning here. Count them out loud so I can hear you. [If the response is correct (15 circles) record 1; record 0 if incorrect]	
Look at the 4 th line of the visual aid. Continue with the following:	
NUMTEST4 Read these numbers out loud. What is this? And this? [Examiner points to the numbers on line 4. Record how many numbers the respondent correctly identifies: total is 5. Write the number of digits the respondent identified correctly.]	Number of digits correctly identified
In the questions below record 1 for each correct answer	
Next say:	
NUMTEST5 Show me three fingers, [Record 1 if the answer is correct]	
Then say:	

NUMTEST6 Show me eight fingers. [Record 1 if the answer is correct]	
Say:	
NUMTEST7 Which is greater, 9 or 6? [Record 1 if the answer is correct]	
Then say:	
NUMTEST8 Which is greater, 42 or 28? [Record 1 if the answer is correct]	
Next say:	
NUMTEST9 If you have 3 meticals, and spend 1 of them, how many do you have left? [Record 1 if the answer is correct]	
Then say:	
NUMTEST10 How many are 3 mangos plus 4 mangos? [Record 1 if the answer is correct]	
Say:	
NUMTEST11 Juliao had 9 pencils. He lost 3 of them. How many does he have left? [Record 1 if the answer is correct]
