

Febrile Traveler Screening (Updated April 6, 2023):

Use this tool for patients that have presented to VUMC with the following:

- Fever ($\geq 100.4^{\circ}\text{F}$) within the past 24 hours
- Travel **within the past four weeks** to countries outside of North and South America

[They may also have reported symptoms of respiratory illness (e.g. cough or shortness of breath) in the past 24 hours, but this is not required for all contagious infections of concern]

Triage by Specific Infection:

Marburg Disease:

Currently circulating in the following countries:

**Equatorial Guinea
Tanzania**
