

Title: Country Privacy Risk Scores

Description: The VUMC International Privacy Office (IPO) assigns a privacy risk score to each country. The IPO uses these baseline scores when assessing if a particular project needs further approval to proceed. When planning a project, additional approval delays may occur for any research in a country with a score over 20.

When applying for an NIH-funded grant please consult these scores as an aid to assessing whether foreign laws may impact on your data sharing plans. For more information on how the IPO and contracts office use these scores consult the **Policy:** International Data Privacy: Assessment and Remediation of Privacy Risks Arising from the Processing of Non-U.S. Personal Information, and the **SOP:** International Data Privacy: Risk Assessment and Remediation.

Date RA Updated	COUNTRY	RISK STATUS	RISK SCORE
22-Aug-2022	Afghanistan	To Be Assessed	To Be Assessed
05-Jul-2021	Albania	To Be Assessed	To Be Assessed
