

Microsoft MFA

WHAT is it?

WHY are we doing it?

(Multi-factor Authentication)

MFA adds a layer of protection to the **sign-in process**. Typically, in the form of an app notification on a device or other methods.

- To allow staff to work efficiently from anywhere, while keeping VUMC content secure.
- To enhance your work experience with modern security features to protect you and your VUMC data.
- To pave the way for future initiatives at VUMC around application and content security as we move away from shared VU resources.
