WHAT is it?	WHY are we doing it?
A VUMC IT multi-year initiative supporting ongoing efforts to create **secure** and **modern technology environments**.	As a result of ExpeditionTech, workforce members will experience: ✓ **Improved flexibility** through real-time collaboration ✓ **Easier, more secure access** to systems, applications, & documents ✓ **Enhanced productivity** through new, modernized tools

ExpeditionTech

WHAT are we focused on in 2021?

COLLABORATIVE TOOLS	SECURED ACCESS & DEVICES	MODERNIZED WORKSTATIONS

What is changing?

• Standardize OneDrive* as our individual file-sharing, cloud storage, and collaboration solution • Standardize SharePoint Online as our department file share solution	• Move our application and device management tools to one platform, leveraging the below Microsoft Applications: - Multi Factor Authentication (MFA) - Mobile Application Management (MAM) - Mobile Device Management (MDM)	• Modernize all workstations to support new technology for: - Dedicated administrative workstations - Shared administrative workstations - Clinical workstations

Who will be impacted?

• All administrative workforce members • All clinical workforce members who store files outside of the eStar system	• Anyone who uses VUMC Apps/Services must eventually enroll in Microsoft MFA • Anyone who uses Microsoft Office 365 Apps/Services on a personal device must enroll in MAM • Anyone who uses Mobile Heartbeat (e.g., MH-Cure) and/or Power Mic on a personal device must enroll in MDM	• Ultimately all workstations will be modernized, with an initial 2021 focus on new hire workstations and workstation rebuilds

What's next?

Throughout 2021, you can expect to receive VUMC IT support to guide you through these changes, along with regular updates tailored to your specific department or group.

At this time, VUMC remains committed to Box as an enterprise collaboration platform. Through our ExpeditionTech program efforts we will be aligning more content towards Microsoft's cloud services, however we have no near-term plans for a managed migration to those services from Box.
