V.A. Network Jack Coding:

Typical V.A. Jack:

2305139

2305139 Red

2305139 White

2305139 Blue

2305140 Red

2305140 White

2305140 Blue

2305140

2	305	139

V.A. building number. In this case, Acre bldg.
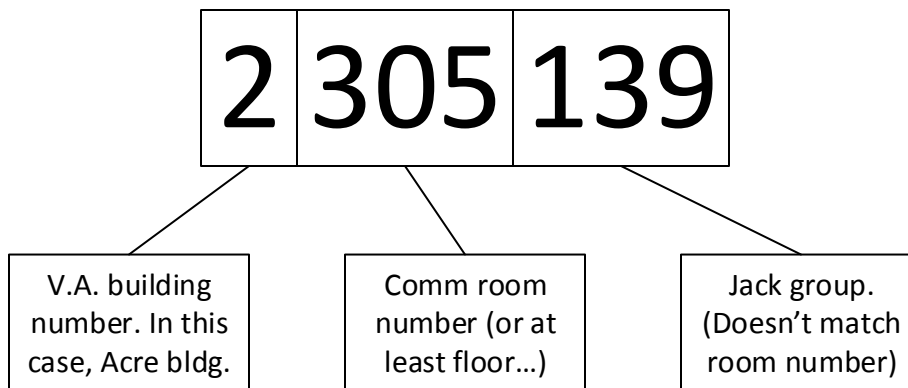

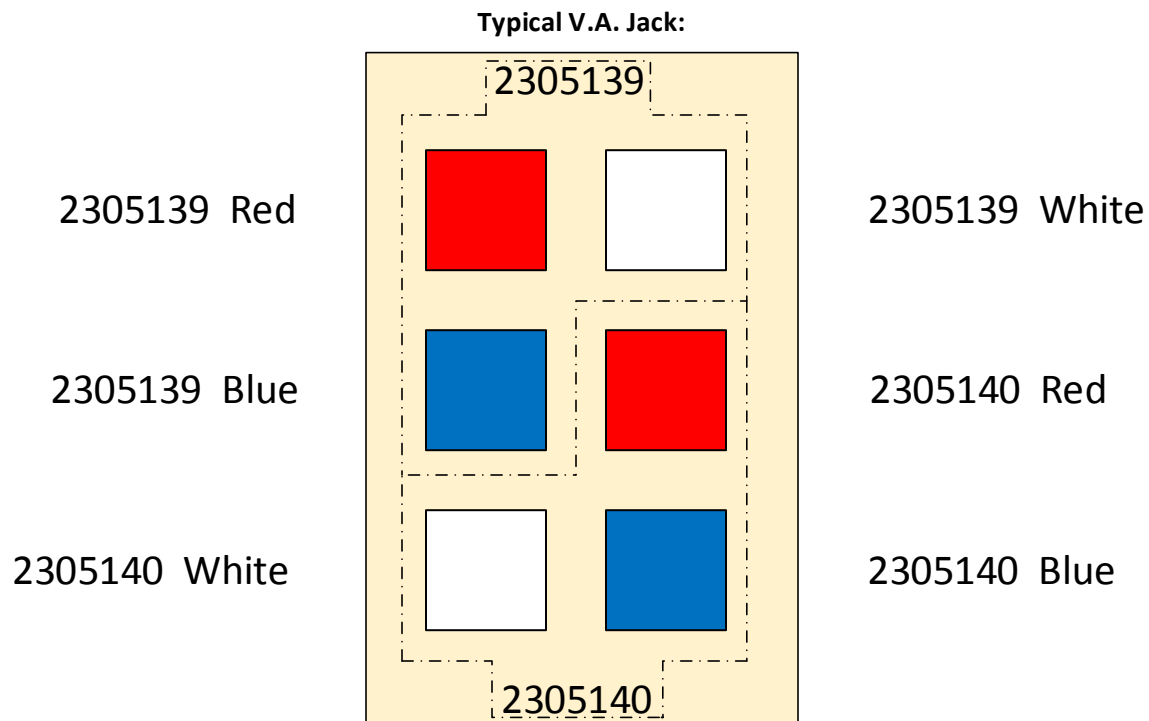

Comm room number (or at least floor...)

Jack group. (Doesn't match room number)

Jacks are arranged in two groupings of three, each color-coded Red, White, & Blue in reading order from left to right and top to bottom. The number at the top of the wall plate indicates the first group of three, the bottom number is for the next group of three.

When requesting a port activation it will help expedite the ticket to include:

- Building (Acre Bldg. or ?)
- Room number
- Jack number on wall plate
- Jack color
- Customer name and contact information

Reserved jack color codes:

White- 1st choice for Vanderbilt
Red- 2nd choice for Vanderbilt
Blue- V.A. Hospital Only
