myworkday

5 Things to Know About myworkday

1. What is MyWorkday?

MyWorkday is VUMC's **enterprise-wide project** to transform our **business systems**. We will now use **two new cloud-based tools, Workday and Tecsys**, for most of our **HR, Finance, Supply Chain, and Research** and **Grants** needs.

2. Why are we doing this?

MyWorkday will help modernize and simplify our business systems by **replacing literally dozens of tools with only two.** The new technology will also help support VUMC's continued growth, so we can **take care of more patients** and **their families** in our region.

3. What does MyWorkday mean for me?

Instead of logging into multiple systems (such as C2HR, Performance Central, and Benefits Express) to take care of your administrative and HR tasks, you'll now use Workday, **ONE user-friendly tool**, for most of these. If you work in a clinical area that uses point-of-use (POU) technology, you will like Tecsys's **simpler workflows** and state-of-the-art technology.

4. How will I learn to use the new tools?

We'll start **online training** in **February/March of 2023**. Some of your co-workers will trained as super users a bit earlier to provide support to help if you have questions or need guidance at Go Live.

FEB   **MAR**
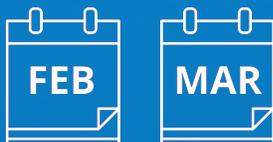

5. When will we start using Workday and Tecsys?

We'll start **using the new tools** on **April 1, 2023**. We'll go live with the budgeting and forecasting tool later that **summer.**
