Department Management System (DMS)	Encumbrance/commitment accounting system to help research areas track available funds on grants. CTM Description: Departmental Management System (DMS) is a web-based commitment accounting system designed and developed at VUMC to help departments manage budgetary spending. DMS connects with the Financial APPO system to automatically encumber when a purchase is made and to relieve that encumbrance when the related payment is processed. Similarly, DMS connects to HR job data to encumber for employee payrolls and relieve encumbrances once the payroll has processed.DMS requires Privilege Management privilege assignments in order to create and edit budgets and manage labor and/or non labor encumbrances in the DMS web application.
