

Myworkday

VANDERBILT VUNIVERSITY MEDICAL CENTER

MyWorkday Cutover Connection will help prepare you for the process of cutover.

What is Cutover? During cutover, we will move away from multiple existing systems to two new systems, Tecsys and Workday, for most of our key business tasks. Cutover requires moving data - so there will be some limitations on using our retiring systems and performing some activities. These limitations will help us minimize errors that would require "clean-up" after our Go Live date or having to do difficult manual processes to help us catch up on transactions.

What does that mean for me? Closely review the information below. To make the cutover process smoother, we are reducing or limiting systems. For example, you might want to delay hiring a non-critical new employee until after April 2023 or avoid ordering new supplies in March if they are not essential for patient care. As a health system, we will pause opening new departments/clinics during periods where systems that support those types of activities are unavailable. Keep familiarizing yourself with what's ahead in terms of freeze dates. Focus on what transactions you can do now. For each freeze date, you may want to set deadlines within your department asking them to provide requests for the future that we are able to process now. The information below highlights the most immediate impacts (newer items are in orange). Note: all items below apply to every employee in the organization and are not specific to a single department. For a comprehensive overview of cutover-related information, please refer to vumc.org/myworkday/cutover.

| System or Business Process | Date of Impact | Activity | Resumption of Process | N |
|-------------------------------|------------------------------------|--|--|--|
| Health System | Late January – End of August | Some business activities slow down or stop during this period: Clinical practice openings or acquisitions (changes that require Epic build) Acquisitions/upgrades requiring IT support | Early summer 2023 ¹ (testing to begin in mid-May) | New locations/departments may tentatively resume in early summ |
