

TEST INFORMATION UPDATE

Coagulation Test Schedule Updates

Effective Date: December 11, 2022

Effective December 11, 2022, the testing schedule for VUMC esoteric coagulation assays will be revised.

The following coagulation tests will be performed Monday-Friday:

ADAMTS13

HIT ELISA & Serotonin Release Assay

Antiphospholipid antibody testing (ASP) [StaClotLA; dRVVT; anti-cardiolipin antibody IgG, IgM; anti-beta-e-glycoprotein-1 antibody IgG, IgM]

Venous thromboembolism testing (VTH) [protein C & S activities, activated protein C resistance assay]

Mixing studies (PT >3 seconds prolonged, aPTT >5 seconds prolonged)

Factor activities & inhibitor assays

Chromogenic factor activities & inhibitor assays

Von Willebrand testing – antigen level, ristocetin cofactor

Reptilase time

Urea clot lysis assay

Euglobulin lysis assay

Bivalirudin level

Prekallikrein screen

Plasminogen activity

HMWK screen
