

Handheld Device Updates

As of Tecsys 26.1.0, the following resources are available on handheld devices. These resources have previously been available using the Tecsys Desktop application.

Location Item Configuration: Provides the ability to modify min/max quantities, adjust bin location info, and print labels directly from the handheld device.

Print Bin Labels: Use the hamburger menu icon at the bottom to Print Bin Labels directly from the handheld device.

Manage Tracked Item – allows users to manage tracked items on the handheld device. This includes adding tracking events, changing locations and updating UDI information.
