

IMPLANTS THAT ARE USED NOT IMPLANTED

Some items are documented as implants even though they don't remain in the patients' body. Often times these items are used in conjunction with an implant, such as a guidewire. Or they may be actual implants that were placed in the body and removed, perhaps due to an incorrect size.

1. Document the item as a regular implant in the CDUI, including site/laterality and any required UDI info. Then click on Implant in the Action column and select Used not Implanted.
2. The implant now shows Used not Implanted as the action.

Item Description	Manufacturer Item	Type	Site	Laterality	Action	Physician
PIN BNE GUIDEWIRE TROCAR 0.7MM	AR-18700-02	Temporary fixation pin or wire	Hand	Right	Implant	SURGERY, PHYSICIAN

Item Description	Manufacturer Item	Type	Site	Laterality	Action	Physician	UDI
PIN BNE GUIDEWIRE TROCAR 0.7MM	AR-18700-02	Temporary fixation pin or wire	Hand	Right	Used not Implanted	SURGERY, PHYSICIAN	987898789 - 2027-07-03

When the data is sent to Epic it will show that the item was Used not Implanted. The Implanted By and Time of Implant fields will be left blank since the item was not actually implanted.

⚠ This implant is protected from editing because it was documented in an external system.

Inventory Info

Implant name: PIN BNE GUIDEWIRE TROCAR 0.7MM - LOG11947

Inventory item: PIN BNE GUIDEWIRE TROCAR 0.7

Supply type: Implant

Model/Cat no.: AR-18700-02

Supplier: Arthrex Inc

SMDA? Yes No

Inventory location: Vanderbilt University Medical Center

Implant type: Temporary fixation pin or wire

Manufacturer: ARTHREX
