

Tecsys CDUI Case Selection

Use this document as a reference for selecting a case to document in the Tecsys Point-of-Use (POU) system.

DO NOT open the Tecsys tab in EPIC until a completed pack list is present .

The screenshot shows the EPIC Intra-op interface for patient 'Eight Tecsit'. The 'Tecsys' tab is highlighted with a red box, and a yellow arrow points to it from the right. The interface includes a left sidebar with patient information, a top navigation bar with various tabs, and a main content area with sections for 'PRE-INCISION', 'Panel Information With CPT Code', 'Allergies', 'Prior to Admission Medications', and 'Anesthesia History'.

If a Pack List is not available, contact Materials Management before opening the Tecsys tab.

Please be sure there is a copy of the completed pack list before opening the Tecsys/CDUI tab for a case. If not, team members may:

- Not be able to document and case details will not display in CDUI (if case planned, but not fully picked)
- Be required to scan everything into CDUI because items/implants not populated (if case is not planned and still in “new” status)
