

Adding Multiple Implants At One Time — CDUI for OR

A change is coming to Tecsys on 7/22/23 to enable adding multiple quantities of tray implants at one time. This function only works in the Tray Helper screen and should reduce documentation time on cases with a high number of implants. The materials team is working to get Tray Helper built out for every tray.

Adding Multiple Implants

1. Within the CDUI tab for the OR, enter a **default implant site** and **laterality** before adding any implants.

Note: If you do not enter the default values first, you will have to enter this data on each individual patient.

2. Scan in your implant trays and select the **hyperlink** to open **Tray Helper** for that tray.
3. Select **Expand All** to open the contents of the tray.
4. Select **Add Many** to add multiple quantities of an item.
5. Enter the **Quantity** used and select **Done**.
6. Review the multiple implants that appear in the **Implant Log** based on the quantity entered.

Defaults for next implant:	Site	Laterality	Action	Physician
	Leg	Right	Implant	SURGERY_PHYSICIAN

Description	Manufacturer Item	Tray	Open Tray
CH ORTHO TAYLOR SPATIA...		101125	<input type="checkbox"/>
CH SYNTHES LOCKING MIN...		122027	<input type="checkbox"/>
SYNTHES 3.0 CANNULATED...		100754	<input type="checkbox"/>
