

# Document an Implant

Learn how to document an implant supply item using the Implant Log pop-up window.

1. **Scan** the implant.
2. Select the **Implant Log** section.

Implant Log					
Document Explants					
Defaults for next implant:					
Site	Laterality	Action	Physician		
(Site)	N/A	Implant	KNIGHT.WADE LEON		
Additional Information					
Item Description	Site	Laterality	Action	Physician	UDI
AGENT HEMOSTATIC ABSORBABLE 100 CM 8X12.5X10 MM SPONGE WATER INSOLUBLE MALLEABLE FOR CONTINUOUS OOZING GELATIN STERILE Manufacturer Item: 1074 Type:	(Implant Site)	N/A	Implant	KNIGHT.WADE LEON	Optional

3. Locate the implant you would like to document.
4. Enter any required information about the implant such as **Site**, **Laterality**, **Action**, **Physician**, or **UDI** by selecting the **hyperlink** for each documentation needed and entering the necessary information in the pop-up window.

*Note: Some information will default into the Implant Log fields, such as the Action "Implant", as well as the case Physician name. This can be changed on each line as necessary. Settings can be updated prior to documenting implants in order to prefill fields as appropriate.*

5. Select **Done**. The implant will now appear in the Implant Log.
