Readability of Online Patient Education Materials for Adenotonsillectomy

The National Institutes of Health and American Medical Association have recommended that patient information be written at or below a sixth grade level. While many patients and families seek medical information pertaining to adenotonsillectomy on the Internet, the reading level at which such content is written is currently unknown.

- **Aim 1:** We aim to characterize the readability of publically available patient education materials regarding adenotonsillectomy to identify areas for improvement.
