

Incidence of Adenoid Hypertrophy in Preterm Infants with Nasogastric Tubes

The purpose of this study is to examine whether there is a correlation between adenoid hypertrophy and nasogastric tube usage in preterm infants. The results of this study could potentially improve patient outcomes and lead to further research into nasogastric tube materials.

- **Aim 1:** Assess nasogastric tube usage in preterm infants
- **Aim 2:** Evaluate the impact NG tubes have on the adenoid tissue
