

## **The Park-Reeves Syringomyelia Research Consortium**

- The purpose of this study is to understand the incidence, natural history, and short- and long-term treatment outcomes of CM (Chiari I Malformation) and SM (Syringomyelia).

**Specific Aim 1:** Create the Park-Reeves Syringomyelia Registry (PRSRC), a comprehensive database to collect and store both prospective and retrospective data regarding SM and CM.

**Specific Aim 2:** Employ advanced MRI techniques to study the pathophysiology and natural history of SM and CM.
