Research studies found a reduction in mortality from lung cancer:

**NLST:** 20%  
**NELSON:** 26%  
**MILD:** 60%  

Men: 39%  
Women: 60%
Current Criteria

55-80 Years Old

30 Pack Year History

Smoked in the last 15 years
Mammography

70% Screened

30% Not Screened
Mammography

70% Screened
30% Not Screened

Lung Screening

97% Not Screened
3% Screened
Lung cancer kills more women than breast & ovarian cancer combined
Targeted Screening
Machine Learning
Clinical & Imaging 92%
Mammography saves lives.
So does lung screening.
