1. From the home screen, tap “Settings.”

2. Select “General” from the left menu then “Device Management” from the right.

4. Select “Remove Management.”

a.
5. Select “Remove.”
   a. Note: This action will remove all VUMC deployed applications and policies. Applications or data not added by VUMC systems during the time the device was enrolled will not be altered.

6. Return to the home screen then long press the Agent icon until it begins to move and an “X” appears in the top left of the icon. Tap the “X.”

7. When prompted, press “Delete” to remove the Agent. This concludes the uninstall process.
