

2016 Clinical TB Symposium: An Update on Treatment and Prevention

March 30th, 2016

8:00 a.m. to 5:00 p.m. Central

Vanderbilt Tuberculosis Center

Tuberculosis Elimination
Program of Tennessee
Department of Health

Southeastern National
Tuberculosis Center

Target Audience

Physicians, advanced practice nurses, clinical researchers, and other healthcare professionals involved in the diagnosis and management of TB disease and *M. tuberculosis* infection.

Course Overview

Geared toward clinicians, this event will engage participants through lecture and discussion of Tennessee's TB cases, with an analysis of clinical challenges and opportunities by a panel of clinical and laboratory experts. Local lodging is available.

Topics Include

- TB and HIV Co-infection
- Epidemiology, Treatment and Prevention of MDR TB
- Isoniazid/ Rifapentine ("3HP") regimen
- Treatment of Latent TB Infection
- Diabetes and TB
- Case Conferences
- Challenges in the Management of Pan-sensitive TB

Upon completion of this course, the participant will:

- Increase awareness of why MDR-TB threatens global health and implications of its effects locally to improve the case rates of TB in local areas.
- Identify the risk-factors for MDR-TB to ensure appropriate evaluation and initial treatment Gain expert insight for the medical management of TB, including MDR-TB, pediatric TB, HIV/TB co-infection and other co-morbidities.
- Identify the epidemiology of diabetes in the TB population to increase the awareness of treatment complexities for providers who treat this challenging population.

Registration

- Participants must have basic knowledge of tuberculosis.
- The course is free but you must pre-register to attend.
- Registration is available online at <http://sntc.medicine.ufl.edu/training.aspx>

Continuing Education
