

VANDERBILT TRANSPLANT

Clinical Management of the Transplant Patient

Welcome to the Annual

Vanderbilt Transplant Advanced Practice Provider Symposium

The Vanderbilt Transplant Symposium is a long-standing, established conference designed to address the complexities of managing the transplant patient within the scope of practice of advanced practice providers, including Nurse Practitioners, Transplant Coordinators, *Physician Assistants, Registered Nurses, educators, and other advanced transplant professionals.

As the transplant multidisciplinary teams continue to expand and care for an ever-increasing patient population, we realize the providers' roles of focusing on acute/chronic illness with an emphasis on preventative maintenance have become vital to the lifelong care of these patients and their unique needs. We are committed to providing you with the most current data and best practices by presenting evidence-based transplant practice in a non-biased format. This conference is hosted in person with enduring materials.
