DETERMINING BRAIN DEATH

Notify Tennessee Donor Services (TDS): 1-800-969-4438

Prerequisites (ALL must be checked)

☐ Coma, irreversible and cause known
☐ Neuroimaging explains coma
☐ CNS depressant drug effect absent (if indicated toxicology screen; if barbiturates given, serum level<10 μg/mL)
☐ No evidence of residual paralytics (electrical stimulation if paralytics used)
☐ Absence of severe acid-base, electrolyte, endocrine abnormality
☐ pH is below 7.45
☐ Normothermia or mild hypothermia (core temperature >36°C)
☐ Systolic blood pressure ≥ 100 mmHg
☐ No spontaneous respirations
☐ Absence of cervical spinal cord injury

Examination (ALL must be checked)

☐ Pupils non-reactive to bright light
☐ Corneal reflex absent
☐ Oculocephalic reflex absent (tested only if C-spine integrity ensured)
☐ Oculovestibular reflex absent
☐ No facial movement to noxious stimuli at supraorbital nerve, temporomandibular joint
☐ Gag reflex absent
☐ Cough reflex absent to tracheal suctioning

***If patient is under 18 years of age, two brain death tests must be performed. If brain death is determined by clinical exam (e.g. apnea test), 12 hours apart by two different ICU attending physicians. If radiographic study consistent with brain death should be accompanied by a clinical exam but doesn’t require a second exam.***

*Attending MUST BE PRESENT thru Apnea Testing*

☐ Patient is hemodynamically stable
☐ Ventilator is adjusted to provide normocarbia (PaCO₂ 34-45 mmHg)
☐ Patient pre-oxygenated with 100% FiO₂ for >10 minutes to PaO₂ > 200 mmHg
☐ Patient well oxygenated with a PEEP of 5 cmH₂O
☐ Provide oxygen via a suction catheter to the level of the carina at 6 L/min or attach T-piece with CPAP at 5 cm mmHg
☐ Disconnect ventilator
☐ Spontaneous respirations absent
☐ Arterial blood gas drawn at 10 minutes
☐ Patient reconnected to ventilator

(Hemodynamic instability or Oxygen Desaturation)

Apnea Test Aborted

☐ Cerebral angiogram
☐ Nuclear Scintigraphy
Cerebral Brain Flow Study

pCO₂ ≥ 60 mmHg, or 20 mmHg rise from normal baseline value

**TRAUMA TEAM DUTIES:**

1. Notify attending on call
2. Tennessee Donor Services (TDS): 1-800-969-4438 TDS is to be called on all deaths and all pending deaths
3. Complete Brain Death Note in eStar
4. Medical Examiner Office: 615-743-1800
   Medical Examiner office is to be called on trauma service deaths
5. Decedent Affairs: 615-835-1497 (pager)
DETERMINING BRAIN DEATH
Notify Tennessee Donor Services (TDS): 1-800-969-4438

6. Complete eStar Report of Death and Death Summary

ANCILLARY TESTS:
- Cerebral Angiogram: Formal arteriography gold-standard, CTA and/or MRA are not valid alternatives
- Nuclear Scintigraphy Cerebral Brain Flow Study: Tc99m Hexametazime Nuclear medicine scan
