Calling All Primary, Elementary and Middle School Science Teachers!

Hosted By:
Vanderbilt Institute for Infection, Immunology and Inflammation (VI4)

Where:
The Martin Professional Development Center, next to Eakin Elementary
2400 Fairfax Ave, Nashville, TN 37212

When:
October 27, 2018
From 9am to 2pm

For More Information:
www.vumc.org/vi4/outreach

The Vanderbilt Institute for Infection, Immunology and Inflammation (VI4), would like to invite all primary, elementary and middle school science teachers to join us at MEGAMicrobe on October 27, 2018. Attendance is welcome anytime between the hours of 9am and 2pm.

MEGAMicrobe is a free, community focused, half-day event, geared towards celebrating microbes and science. Volunteers are dedicated to spreading the word that science is fun, accessible and important.

There will be 20 booths, with a team of scientists at each. They are prepared to dress up, perform experiments, make crafts, play games and hand out prizes in the name of science! Topics range from microbes, food, frogs and bugs, to computational immunology, Wolbachia, vector-borne diseases and epidemiology.

Each teacher who attends MEGAMicrobe will receive numerous ready-made lesson plans and may exit with an additional raffle prize! We have stacks of education books, games, supplies and more!

If you have any questions, please reach out to: Megan.Simonson@vumc.org
