MEGAMicrobe! The Stranger Things about Microbes
"A world within our own that will turn what you know upside down"

MEGAMicrobe would like to show your child, 6 -14 years old, that science might be strange but it isn’t anything to be scared about! Join us on October 28, 2017, from 9am to 2pm at the Martin Professional Development Center, to learn about and celebrate microbes! Dress up to compete in our spooky microbe costume contest! Have fun with scientists, perform spooky experiments, make crafts, play games and win prizes!

For questions, please contact: Kaleigh.Johnson@Vanderbilt.edu

When:
October 28, 2017 from 9 am to 2 pm

Where:
The Martin Professional Development Center, next to Eakin Elementary
2400 Fairfax Ave, Nashville, TN 37212
